PERSÖNLICHE ANGABEN

Geburtsdatum: 23. März 2001

Familienstand: Ledig

Sprachen: Englisch (IELTS 7,0), Arabisch (Muttersprache), Deutsch (A2)

BERUFLICHES PROFIL

Software Engineer with 1+ year of professional experience building scalable backend systems, RESTful APIs, and distributed architectures. Promoted to Backend Tech Lead within the same year, overseeing architecture, timelines, and team coordination across multiple live products. Currently pursuing an M.Sc. in Distributed Systems Engineering at TU Dresden. Core strengths in Django, Node.js, Vue.js, and Docker-based deployments.

TECHNISCHE KENNTNISSE

Sprachen: Python, JavaScript (ES6+), TypeScript, Java, SQL

Backend: Django REST Framework, Node.js, REST API Design, WebSockets (Socket.IO)

Frontend: Vue 3, React, Angular, Tailwind CSS, Bootstrap

Datenbanken: , MySQL, MongoDB (Atlas), Schema Design & Optimization

DevOps & Cloud: Docker (multi-container), Git & GitHub, AWS S3

Architektur: MVC, Modular Architecture, Role-Based Access Control (RBAC)

Testing & QA: Unit Testing, API Test Coverage, Code Reviews, Refactoring

Integrationen: Zid Store API, Twitter/X API, WhatsApp Business API, 100ms Video API

BERUFSERFAHRUNG PostgreSQL

Head Backend Developer (Tech Lead) | UZD Software Solutions *Dez 2024 – Jan 2026*

Al-Khobar, Saudi-Arabien | *Befördert vom Backend Developer zum Tech Lead*

- Led backend architecture and project planning — timeline estimation, task delegation, and API design using Django REST Framework with full unit test coverage.
- Architected integrations with Zid Store, Twitter/X, and Football APIs; optimized server-side chains to reduce external calls and lower infrastructure costs.
- Mentored junior developers through code reviews, restructured legacy database schemas, and collaborated with clients to define system requirements.

Software Engineering Intern | LabSystems *Jun 2024 – Sep 2024*

Al-Khobar, Saudi-Arabien

- Developed Java drivers to interface laboratory instruments with the LabVantage data management system, enabling automated data transfer.
- Built and integrated report templates into the system; participated in code reviews and facilitated team knowledge sharing on new technologies.

Software Engineering Intern | SOL *Jun 2023 – Aug 2023*

Al-Khobar, Saudi-Arabien

- Built a modular Angular (TypeScript) front-end application, transforming Figma designs into responsive interfaces and contributing to the landing page and Team Members feature.
- Conducted code reviews enforcing quality, documentation, and reusability standards across the team.

PROJEKTERFAHRUNG

Darah – Real Estate Management System | UZD Software Solutions *Jul 2025 – Jan 2026*

- Directed a full backend system overhaul as acting tech lead; decomposed a monolithic Docker setup into 3 specialized service containers for improved scalability.
- Managed branch strategy and enforced pull request reviews to maintain codebase integrity throughout the project.

O Plus – Al-Ettifaq Football Club App | UZD Software Solutions *Feb 2025 – Jul 2025*

- Integrated Zid Store and Twitter/X API to centralize product data and enable in-app social media interaction without leaving the application.
- Built a gamified points/rewards system triggered by user actions (likes, comments, daily logins) to drive engagement.

Scraapy.sa – Scrap Marketplace Platform | UZD Software Solutions *Feb 2025 – Mai 2025*

- Redesigned the database schema of an inherited codebase; implemented RBAC with layered user privileges and rewrote full API test suites.
- Built geofencing-based product suggestions and a driver dispatch system with real-time item tracking integrated into the buyer-facing interface.

Cartify – Smart Cashier System | Persönliches Projekt *Jul 2024 – Jan 2025*

- Developed a cross-platform cashier system (Vue 3 + Tauri + Django) with a 20% boost in transaction speed and a real-time admin dashboard reducing reporting errors by 15%.

AUSBILDUNG

M.Sc. Distributed Systems Engineering | Technische Universität Dresden *Okt 2025 – Okt 2028 (erwartet)*

B.Sc. Software Engineering | King Fahd University of Petroleum & Minerals (KFUPM) *Jul 2019 – Jan 2024*

GPA: 3,56 / 4,0 | Dean's Honor List: 5 Semester

Zertifikat: Datenanalyse mit Python | KFUPM *Jun 2022*

Dresden, April 2026
